

WOUND HEALING CENTER

Comprehensive Wound Treatment

Our Wound Healing Center offers the latest in care for chronic wounds, including clinical treatments, therapies and various support services. Our expert care team is here to help you heal, finding the cause and partnering with your primary care team to treat any surrounding health issues that contribute.

Treatment is available for:

- Arterial ulcers
- Diabetic foot ulcers
- Infection in the bone
- Non-healing surgical wounds
- Burns
- Venous stasis leg ulcers
- And more

We accept most insurance plans.
Please contact us for more information.

Each patient is thoroughly evaluated and provided with a customized treatment plan that may include:

- Compression therapy
- Debridement
- Pressure relief
- Infection control
- Proper shoe wear
- Surgical consults

If you have a wound that is infected, heals then reopens, has been present for at least one month, or has not shown any improvement after two weeks, consult with your primary care provider about a referral to our Wound Healing Center. Patients with diabetes or certain medical history may have additional guidelines.

Your partner for healing. Your partner for life.
